GALAXY ENTERTAINMENT GROUP REVITALIZATION PROJECT

LAI CHI VUN SHIPYARDS

STAY, DINE AND SEE MACAO FOR MICE VISITORS

SUGGESTED ROUTE NEARBY

Introduction

In mid-2024, Galaxy Entertainment Group ("GEG") initiated Phase 1 of the revitalization project at the Lai Chi Vun Shipyards (X11-X15), which was reopened to the public in December 2024. The revitalized area now integrates more elements of technology, family-friendly facilities, and leisure and cultural amenities, catering to the diverse needs of different visitor groups. Among the enhancements, the renovated historical exhibition hall incorporates digital technology to vividly present Macau's traditional shipbuilding history to the public. The newly added recreational facilities, including educational shipbuilding games and a roughly 60-meter-long Skypark built above ground level, cater to children of various ages. The iconic stepped seating area, which can accommodate around 80 people, offers a location for leisure and outdoor performances. Additionally, different types of seating set up near the coastal area of the Lai Chi Vun Shipyards allow visitors to appreciate the natural landscape and ecology of the surrounding coast.

Interactive 3D Display Cabinet

Four 86-inch interactive 3D display cabinets vividly showcase the shipbuilding industry forms, craftmanship, and knowledge of the fishery industry once housed in the Lai Chi Vun Shipyards through interactive methods like touch and 360-degree viewing, marking the first time that interactive 3D display cabinets are used in semi-outdoor areas in Macau.

Augmented Reality Animation

A gantry band saw machine has been put on display at the exhibition hall, allowing visitors to learn about its operation through augmented reality technology by scanning QR code.

Virtual Space Experience

The "Old Shipyard Tour" is Macau's first semi-outdoor large-scale 3D virtual space experience, restoring the original appearance of the old shipyard. Using their phones or tablets, visitors can explore and appreciate the Lai Chi Vun Shipyards' historical scenes from various angles.

Skypark

Being among the largest and safest net climbing facilities in Macau, the Skypark, which has been certified for safety and compliance with European Standards, spans about 60 meters, and rises over 5 meters above ground. Each rope course presents a different challenge, and includes a slide to allow quick decent for children.
